Questions

How can I remove the two y-axis?
How doable are the implementation?

LAYOUT

Title: Visual Narrative

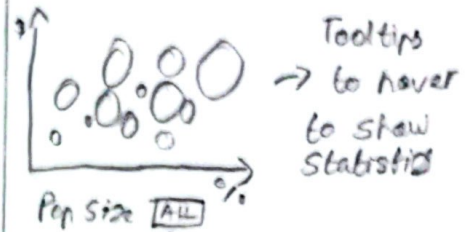

Author: Aditya Jain

Date: 17-10-2025

Sheet: 2

Task: Create Visual Narrative

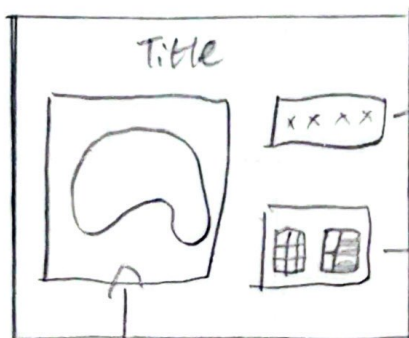

OPERATION:

Filter based on population sizes

Predetermined categories of <5k, 5k-50k and >50k.

FOCUS

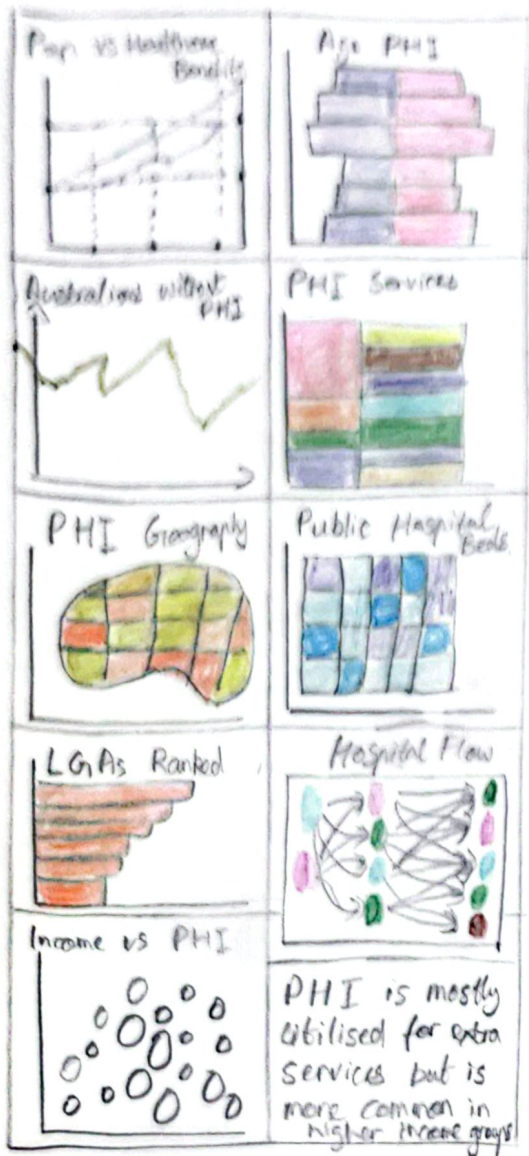

Use a colour saturation to show density within different LGAs.

DISCUSSIONS

- Is the information flow and links between different visualisations apparent?
- Should geographic and age distribution together?

LAYOUT

Title: Narrative Layout

Author: Aditya Jain

Date: 17-10-2025

Sheet: 3

Task: Create visual narrative

OPERATION

LGAs Ranked

→ Hover for tooltips
→ Click to highlight on map

← Selection between top 20 and bottom 20 that shows LGAs from respective categories
→ Reset view to go default

→ Tooltips for more info.

Zoom: 0 → Slider to zoom into map

FOCUS

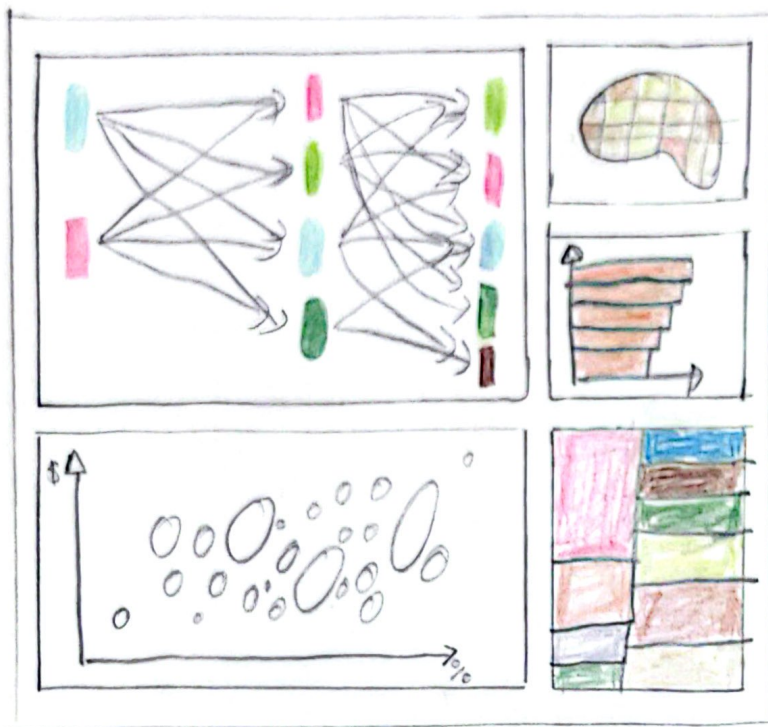

Focus on showcasing how PHI distribution varies between urban vs regional areas, between geographies, with income and age

On every slide, a pop ups after the reader has been on a slide for a specific period of time. Comes up with unique text as caption for each slide.

DISCUSSIONS

- Can be hard for viewer to link earlier visualisation with later ones.
- Can be hard to remember key message.

LAYOUT

Title: Dashboard View

Author: Aditya Jain

Sheet: 1

Task: Create visual narrative,

OPERATIONS

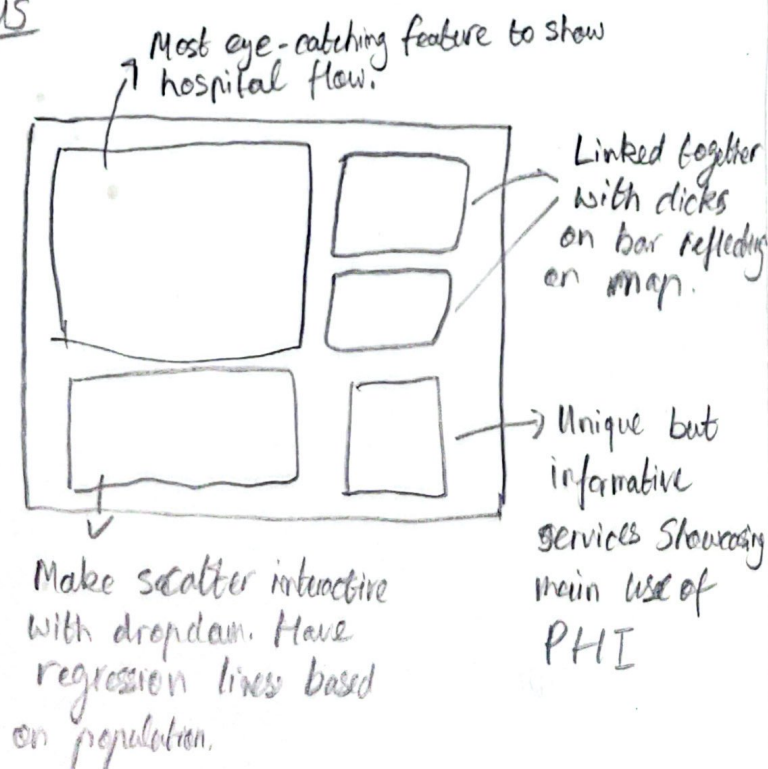

Click on each graph to enlarge it and make it cover 80% screen.

Tooltips are used on an enlarged graph to showcase different statistics.

☐ → Selection dropdown based on population. Dropdown pre-categorised into <5K, 5K-50K, and >50K.

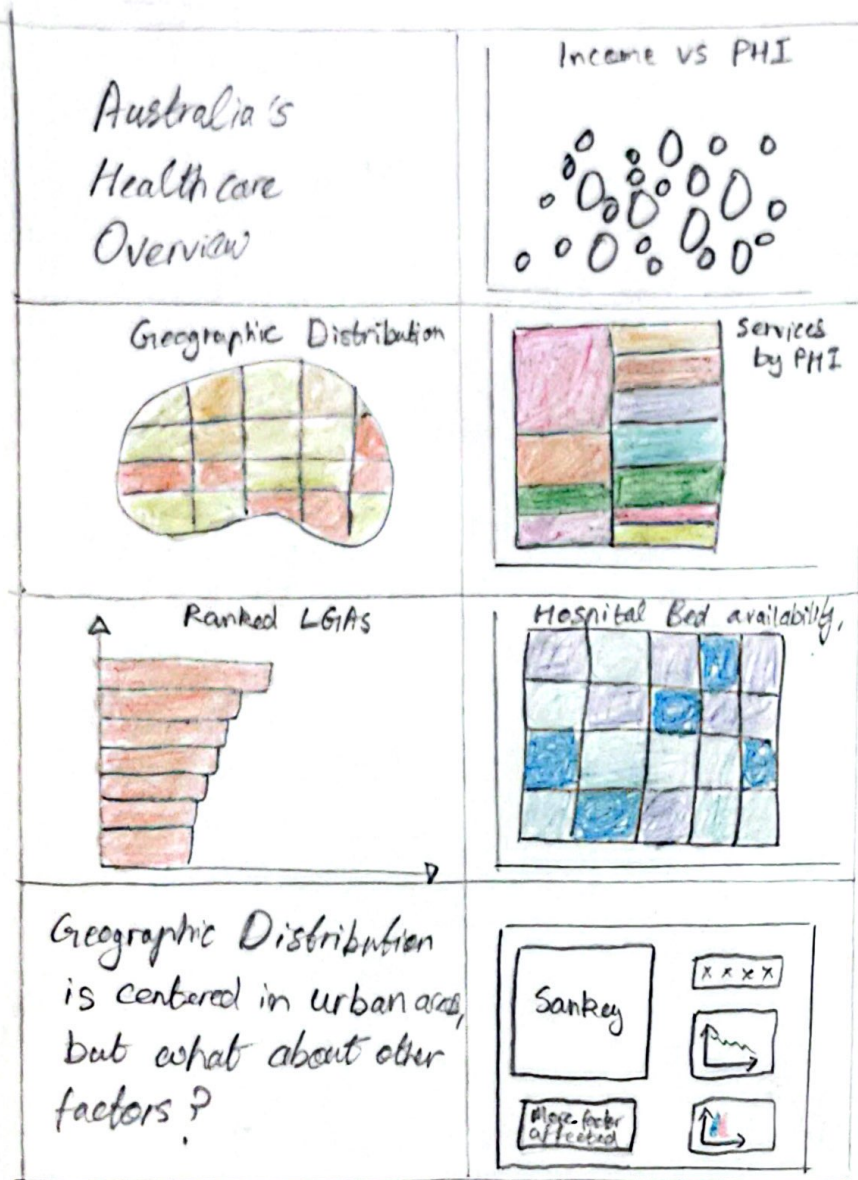

FOCUS

DISCUSSIONS

- Should the enlargement of each graph come with an explanation?
- This is well segmented which allows easy interpretation.
- Lack of detail might make selling the message difficult.

LAYOUT

Title: Final Design Jth

Author: Aditya Jain

Date: 17-10-2023

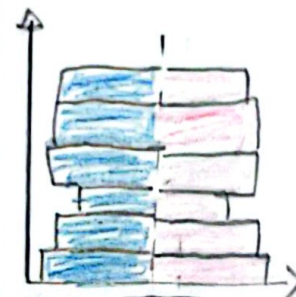

Sheet: 5

Task: Final Implementation Design

OPERATIONS

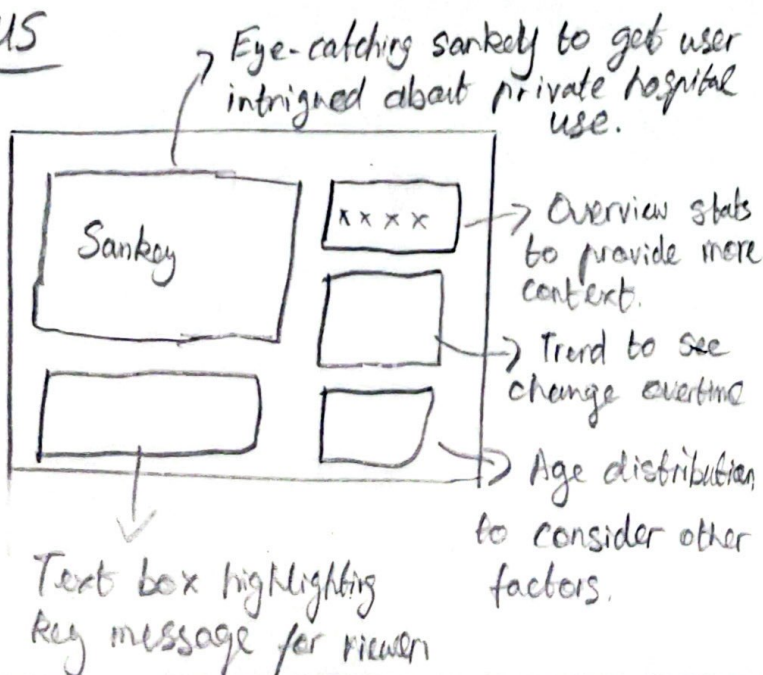

Zoom slider

State

Select based on the different states.

FOCUS

DETAIL

- Mixture of Vega and Vega-like for some visualisations such as Sankey.
- Store data using CSV files.
- Need LGA based TopoJSON for the map.
- Use D3 library.
